Volume Number Three

November 15, 1954

Issue Number Three

Before we go into detail on the report on the AFSB Director's conference with RAAF Intelligence in lielbourne last July, we solemnly and shame-freedly apologize to m.

Jarrold for leaping to conclusions made his momentous announcement regarding his failure to communiter studying some 20,000 photos taken with us. Our reason for clarm ken while in Africa. He is an expension from the fact that there is on Mars, having specialized in the consorship, and also that planet for 50 so much censorship, and also that Mr. Jarrold did not write as soon as he had anticipated that he would.

We cannot report in detail or give a verbatim report of the conference, but will hit the high spots of the talks.

Of course, certain details remain strictly confidential, as is usually the case when the authori- would have settled ties decide to talk to Civilian in- it's entire face. vestigators. Apart from this spec- be-all one color."

subjects of which were introduced into the conversation by him.

(Continued on Page 4, Column 2)

An AP report out of Washington, D. C. in October gave the startling news that Dr. E. C. Slipher, consulting astronomer for National Goo-graphic Magazine, has decided that Mars is very much alive---and does

harbor vegetation.
Dr. Slipher had just returned from his stint as a Mars observer at Bloemfontein, South Africa, and aping to conclusions made his momentous announcement af-failure to communi- ter studying some 20,000 photos ta-Our reason for clarm ken while in Africa. He is an expert

"Mars is alive. It has to be," said Dr. Slipher. Back at his regular station at the Lovell Observatory at Flagstaff, Arizona, the Dr. said: "If things did not grow there, changing with the seasons, dust from the red deserts of Mars would have settled long ago over it's entire face. The planet would

ific limitation, no other restriction was imposed on Director Jarton and the planet Mars, both remarkable about this statement is considered.

This news is not exactly news to this news is not exactly news to the many amateur astronomers, for they have felt that science has not satisfactorily explained away the curve of the particularly interested in UFO turn of seasons. The thing really occupants and the planet Mars, both remarkable about this statement is that a recognized scientist has considered. This news is not exactly news to tisfactorily explained away the cu-rious color changes on Nars at the that a recognized scientist has come out and publicly endorsed the theory.

We ask members to hark back to Page line, Column Two of the APRO Bulletin for September, 1954 and

THIS REALLY HAPPENED! Mr. X, carrying UFO information from one UFO investigator to another in another country, was intercepted by a government investigator and quizzed for a good period of time. The information was sent by personal courier because the sender doubted the safety of said info in the mails. This incident, an actual fact, only serves to further corroborate our suspicions that for some time the personal mail and telephone lines of top investigators of the UFO problem, have been under surveillance. When we say 'top investigators', we specifically designate those bona fide authorities who deal in analysis and correlation of sighting trends——not supposed 'contacters'. It is becoming increasingly evident that the hoaxers are not exposed by the proper authorities because they are a convenient smokescreen for the proper authorities because they are a convenient smokescreen for the real facts which are both alarming and very well concealed. We would like to make a statement at this time regarding the so-called contacters: Then the real truth does come out, they willbe the most surprised of anyone, and our little playmates who fraternize with imaginary space travelers will sport some mighty rosy complexions;

In order to forestall a runor which will take shape shortly, unless nipped in the bud at this time, the Director would like to assure the membership that she has not been shut up and that trans-ferral of the duties of printing the APRO Bulletin to the Los Angeles members constitutes an act of expediency rather than that of a result of coercion.

The simple fact is this: With no members in Alamogordo, it is im-Bulletin out every 8 weeks. Also, because of the high cost of doctor's care and drugs, the Director has been forced to take a job in order to pay the freight. Her ill-ness is of a nature that prevents bile and at the same time earning enough to pay for domestic help plus medical expenses is the answer to the quandary.

Of course, she feels that the Los Angeles membership will-do a good job, and what with sugges-tions and plans already submitted to her for various changes, she is confident that actually. change will be for the better.

come a language paper in Venezuc-la and India before many moons. Members there are planning to translate the Bulletin into their native language upon receipt of it there, and therefore reach more people and gather more sightings. This, we expect, will be a big step in the right direction, and will increase interest not only in the organization, but in UFO research in general.

Again, too many sightings for inclusion at this time are on the desk of the Director, and therefore will be carried in ensuing issues. We have picked the most detailed, attempting to give coverage to most countries. We had planned to use these sightings during the year 1955 when saucer sightings We cannot elucidate at this time regarding our conjecture that saucerwe sincerely hope that all members sightings will be abundant in 1955, in the United States will inquire but hope to be able to do so in the as to the possibility of acquiring near future.

regarding last issue's editorial

were welcome and appreciated. much as all were complimentary, we must capitulate and admit that the

ethical minority is growing. ... well-known, accredited publish-ing company has approached the Director with a request for cooperation and contributions to a proposed 'symposium' on the UFO mystery. Nothing definite has been arranged, but if an intelligent approach is adapted by the company in the com-pilation of the material and the possible for her, with failing writing of the same, we believe it health, to continue to shoulder the may be advantageous and in the interwork load involved in getting the ests of UFO research to cooperate to the limit of our ability.

il though saucer news is held to a minimum by a 'gentleman's' agreement between the Lir Force contingent of the Pentagon and the wire ness is of a nature that prevents her from even keeping up her domestic duties, therefore a desk job which will keep her fairly immowhich and at the same time corming important for it the same time corming. important, for if the ability grasp and accept the UFO ramifications by the public is more limited than assumed by individuals already deep into the subject, it will take a lot of doing and a lot of time to bring about a favorable 'atmosphere' wherein some of the more important details can be dis-closed. This may seem as though we have turncoated and are running APRO will in all probability be-with the hounds, but this is not the case. Although we believe that the human race is not essentially stupid and cowardly, there are those who believe the opposite and they appear to be in control at the present.

> One possible reason (logical or hot) for the Pentagon's reluctance in disclosing their findings on saucers could well be due to a general foul-up in government red tape. my of our imerican members who have ever worked for the government need only reflect a little on the red tape, conflicting opinions, regulations, etc., and they will readily agree that this sort of muddling could be a contributing factor to the Pentagon foul-up on the flying saucer question. DOWN but not OUT is our friend

year 1955 when saucer signatures are at an ebb, but inasmuch as the saucers probably will not be not wards. We recently received a letticeably absent in the coming year, ter from him informing us that he this policy may have to be changed, will soon be available on taped and surplus routine sightings utiles shows which will be sold to indesigned for correlation purposes only. fellow and a reliable reporter --in the United States will inquire as to the possibility of acquiring his new program for local stations. The many letters to the Director Thanks again, Frank, for the generarding last issue's editorial ous comments about our work.*******

APRO Bulletin

Our new Column, PROPWLSH, re-places the GR. PEVINE as the APRO worlds ground other suns, will prove Bulletin undergoes the first of its to be the demise of the self-styled

major changes.

As well as there being a change in the title itself, there has been also a change in the connotation of the title and the name of the new column. Henceforth, enything considered (after much thought and debate) as purely the derelict imaginations of thrill-seekers or deliberate hoaxes.

No. 1: The current rumor going the rounds is that Dwight D. Eisenhower, President of the United States, took orders from humanoid spacemen while visiting Palm Springsdone before it dies. recently, and journeyed to Muroc Air Force Base where he conferred at length with the pilots of a flying saucer. As the story goes, he made an unexpected trip to Palm Springs, the scucer landed and demanded an audience with him, and got it.

This rumor is almost certainly an outgrowth of the report in the January, 1954, bulletin, that a UFO had landed on the California-Oregon border in late November, 1953, and had been transferred to a United States wir Force Base for study by scientists.

Since that time, various rumors involving saucers at Edwards, Muroc, and March .. FBs have circulated, rumor having originated in Southern California, finding it's way to Australia, and swearing that 'reliable sources' (that old, familiar phrase, again) indicate that the thing was unmanned and remote-controlled.

Two little characteristics of most claimed contacts and runors are the lack of photo verification and/or the lack of descriptions of occupants. These are handy loopholes and have been used very extensively. Could be the time is coming when these loopholes will not be big enough and the nincompoops who utilize them now will be crawling back under the flat rocks from whence they sprung, unwept, unhonored and unsung.

This does not mean that those who have been generous with flowery descriptions with the good-lookvisionaries of the tall tales.

The rest of the story on this new and startling rumor is that rfter someone saw what to them was an unidentified object near huroc Testing Grounds; the birth of a rumor was inevitable --- so just as soon as the Prosident decided to take a little extra-curricular jaunt to a favorite resting place, stopping for a surprise visit at one of our wir Bases, the rumor was born. And it seems that a good deal of debunking will have to be

A new development which amounts to just another assinine statement by the Pentagon branch of the ..ir Force, deserves only a small mention in this column because it is pure hogwash. That is the latest official statement glaming the saucers on hallucinations. We would like to suggest to the .ir Force at this time that they either ground every cavilian or malitary pilot who has seen and reported UFOs, or come up with a more sensi-ble theory. They should make it pretty soon---they've been trying hard enough and long enough. the ..ir Force saucer wing can't do that, the Director of this organization challenges them to a public debaye, pitting her wits and information against the best of their experts on balloons, hallucingtions, Venus, inversions, etc., and etc. They don't dare take the dare!
Our grounds for grounding pilots?
---If seucers are due to hallucingtions, the pilots who have sighted them are not mentally competent and therefore should not be trusted with human life and billions of dollars worth of property. This hallucination theory of the air Force's is without a doubt the most ignorant statement of them all, and notwithstanding that, most certainly an insult to the collective intelligence of the American people. Either the air Force has a very low opinion of the intelligence and gullibility of Americans, or they are pretty stupid themselves. Regardless of our inclination to think the latter, we ing space-men will be proved right, must admit that the former is probabecause they have some surprises co-bly the answer. The only stackler ming, too. Science, itself, with new right now is why the mir Force, when facts and figures on the possibilities it has gained control (Page 8, Col.1) O Bandwagon

present evidence which tends to strengthen the theory that scucers are in actuality interplanetary veparently emanating from Mars, etc., concludes that they've been preparing for colonization and are among us now. Heydegger is referred to by Author Bruno) as noted interstellar scientist and apparently wrote the article. Not familiar.

tongued humor was attached, the rr-ticle isn't too childish, is accompanied by-cute cartoosn and at least gives what facts were available at the time.

LIFE, a subsidiary of TIME, or vice versa, featured the same gen-eral theme in their "...stral adventures" in a November issue. This report deals for the most part with sightings, both of the craft and the occupants.

REUTERS staff writer Donald Batchelor contributed a gem in his "Arc Soucers Over ..frica From Outer Space?" which was carried in a few American papers in October. Our clip comes from the St. Louis Globe Democrat for Oct. 17. The text of this article deals with the findings of G. Duncan Fletcher, president of the Kenya Astronomical Association who reached his conclusions regarding the origin and identity of the saucers after careful scrutiny and study of reports plus an experience of his own. He believes the saucers are from ano-ther world, probably friendly and engaged in reconnaisance and manping missions. Wo liked his last "I don't paragraph very well: pretend to know how the objects operate, what they contain or where they come from, but vigilance and a friendly approach to their overtures would appear to be the best course to follow."

Maryland McCormick (some relation of Birdie's?) does the ty-pical sob-sister type of saucer feature in the Chicago Sunday Tribune for October 10. Her inspiration was a visit to Chicago by Desmond Leslie and the most interesting and sage remark in the whole sloppy mess was her next-tolast paragraph in which she states that Leslic might go down in history or perhaps when he was a lit-tle one his Irish nurse may have · had too much imagination.

FATE for November, 1954, con-(Continued on Page 8, Column 1)

J.RROLD REPORTS (Con't from Page 1) Views regarding Martian origin were exchanged, the Director being ques-MRE for September, 1954, ran a- tioned closely regarding purported nother teaser dealing with past and UFO landings and the various types of UFOs reported by eyevitnesses. Birch then proceeded to discuss UFO occupants matter-of-factly, convey-ing directly that the absence of verified landing reports made it appear certain that the Martiens arc unlike us'.

Birch appeared baffled by the apparent inability of UFO occupants to 'land openly' and gave the im-TIME for Oct. 25 featured a run-tians are unlike us' followed sondown on saucers over France, titled
'Martians over France'. No more
than the usual amount of barbtongued humor was attached the spacesuits as we know them, whereas such aids, designed to prolong life in an alien atmosphere, are already possible to some extent on the earth even tho we have not as yet advanced to the actual stage of space travel.

Upon being asked his opinion regarding the unidentified natural phenomena theory, S/L Birch laughed, immediately pointing out that 'if this is the case, surely the fact would have been established with certainty long ago."

The following points were brought out during discussion of official RunF investigations: 1. The RAF has a 'completely open mind' regar-. ding the origin of UFOs. 2. The greater threat' to Australia is currently believed by the RAAF to be coming from 'S. E. Asia' for which reason 'no intensification of RAF research into UFO's as planned immediately'. 3. At present AFI is avaiting 'depth of evidence' as to where UFOs actually come from. 4. No official conclusions regarding specific Australian sightings are over released by AFI. Reports are checked for eircraft, balloons, or other 'orthodox explanations', after other forthodox explanations! other 'orthodox explanations', after which the unsolved cases are simply filed' awaiting 'depth of evidence' regarding the objects' specific origin.

all in all, we gather from hir. Jarrold's report that the Australian government's opinions and actions are considerably more intelligent than those of other governments interested in the saucer phenomena, and that civilian organizations in the 'Down Under' country can hold their heeds high with pride instead of skulking like mongrel dogs with cans tied to their tails. We can all rejoice that there is freedom of speech and the press and opinion in at least one nation in the world.

We would like to again thank Mr.

November 15. <u> 1954</u> .PRO Bulletin We have received so many sightings within the past 8 weeks that we can only pick those which are

periods in sighting reports.

ST. LOUIS. MO., AUG 27, 2 UFO sky toward the East. What is appeared near airport, one in July, the parently the same object, was observed by police at Fargo, N. D. seen near airport, one in July, the other in August. Black object traveling fast seen by Havy Comdr Robert Jackson and family. The other, seen in July, was irregular-shaped, milky-white cloudlike substance possibly 24 by 18 in. and a foot thick man no bigger than a five year old, sighted near ground by workers from a distance of 200 feet or less. Traveling at low speed, made no noise, hopped over or swerved around obtoes. The little man suddenly isotate such as autos and fences: the began to sort of float to his craft. jects such as autos and fences, the eerie object disappeared by making a sharp right turn and climbing into an overcast sky.

requires at times, about six weeks.

A little comment on NEXUS issues
for Oct and Nov are due at this time. The Oct. issue contained a statement that Mesely had in his possession proof of the existence and origin of the saucers, intimating that they belong to the U.S. The so-called documented evidence just isn't possible unless a researcher-gets his hands on top secret documents which is not only impossible but hazardous, to say the least. Inyone who has worked for the government where classified information is daily routed, knows that security measures are so stringent that it would be impossible for anyone to spirit away anything that could pass for 'documented evidence.' This, on top of a hot tip that as a . result in the apswing in other countries of saucer sightings, U.S.

at all. Mr. Mosely then comes out and very sadly states in his Nov. issuc that he cannot after all, give out the good news, and as others have done in the past, cautions other saucer researchers. We can assure our readers of one things --- that if they were Uncle Sam's and someone was getting too close, that person wouldn't even be given a chance to disclose the fact that he suspected the origin. The government of the (Continued on Page Nine, Column One)

SAUCER MAG REVIEWS (Con't from Page Eight) United States moves in mysterious ways it's wonders to perform, and wee unto him who tries to find out anything he shouldn't know about national dafense. ther thing we'd like to mention about NEXUS --- is their rumor that a Communist has been 'planted' in c-That's very saucer organization. a safe rumor anywhere and enytime, for, like germs, the Communists can not be entirely put out of the running and keep showing up in the most likely and unlikely places.
Regarding John Bessor's theory

that saucors are actually stratospheric animals, well, after read-ing Charles Fort and taking into consideration those sightings which might indicate animal substance being involved (these sightings, incidentally, comprise about \$% of the overall count)----Bessor is no more right than all the others who adopt one theory and try to apply it to all of the facts gathered intends to write a book like the There are balloons, planets, air cest of them? planes, reflections, atmospheric and celestial phenomena which have been dubbed saucers, but which are not——it's that small percentage not---it's that small percentage giants in pocketless metallic suits.
that indicates, a solid, metallic BELGRAD, YUGOSLAVIA, Oct. 27.
object capable of tremendous speeds, After many reports of UFOs in this extreme maneuverability and an apperent disregard of gravity. They can also get the Air Force into such a tizzy that they doubletalk. Animal? Huh-uh!

Just one more thing in the NEX-US Oct. issue---regarding the OSLO, Norway sighting of a space-maniour information is that the American aeronaut involved is not a Billic Faurot, but lir. Baily Faurot, also----both he and his wife denied it. could have been him, for he has a crewcut which could hardly be consame might happen to her predictions as happened to the predict hair. Some discrepancies somewhere, of the Oklahoma Indian woman who it would seem!

NEXUS gives all sides --- if anyone is interested in a little light reading on the saucer subject, it can be obtained from P. O. Box 163,

Fort Lee, New Jersey.

to pray. This in November. tion tending to corroborate the sto-traffic inspectors on duty who ry of Gustavo Gonzales, is the re-port that an object meeting the same doscription as that in the Gonzales case, was sighted in Venezuela two hours prior to the incident. PRO member is attempting to get a personal interview with the men involved. WATCH THIS ONE!! Mr. Gonzales and Mr. Rolas, both of Caracas write that people are deeply concerned over this incident, and they believe that something big might break soon——at least in Ve nezuela. It might be interesting to see whether the American press carries any details on this one. HERE'S THE WHOLE STORY --- and probably the most important one in the year of 1954: On November 28, at 2 a. M., Gustavo Gonzales and his helper, Jose Ponce set out for Petare, (20 minutes ride from Caracas and one of the suburbs) to purchase foodstuffs for delivery to markets. They were in a panel truck, which they use in their delivery service, and upon reaching a street which and upon reaching a street which loads to a sausage factory, were we got a short report and held up startled to see a luminous sphere this issue hoping for more information which we have presented here. ing the street. It was suspended 6 feet off the ground. Both Gonzales and Ponce got out of the truck to investigate, and saw a dwarfish man coming toward them. Gonzales grabbed in the mark on Gonzales' body, we the little man and lifted him off believe this account true and the the ground, intending to put him in the truck, and was surprised by the lightness of the man. Gonzales says that the feel of the body was as of stiff hair, and hard. The man gave him a push which knocked him 15 feet away. Ponce verifies this as he watched the scuffle but when just around the corner. Ponce also said that what made him run was the fact that he saw two other little men emerging from the bushes with what looked like hunks of dirt in their hands. These little men leaped into the sphere through an opening in the side. The man with whom Gustavo had grappled then leaped into the fir about six geet, then toward him, his eyes glowing. Scared to death, Gustavo pulled ascout knife he had on him, and as the creature approached him with claws extended, he made a stab at the creature's shoulder but to his surprise the trate. At this moment, another creation a very happy holiday season****

momentarily. He made out that all creatures then jumped into the sphere which shot up into the air and was lost to sight within a few gers, panic-stricken went to church seconds. Overcome with exhaustion PET.RE, VENEZUEL --- new information Ponce related their story to the thought they were drunk. Examination proved they had not had anything to drink. Police later said that if the men had been drinking they would have been arrested for drunken Both men were given sedadriving. tives and at the present, Gustavo Gonzales is under observation by Doctors who are observing the reddish mark left on his side.

Another man, a typesetter, im-mediately came forth to report the incident which he had held secret because of his fear of ridicule. This man, on the 4th of November, was hunting on his launch in the Dolta district when he saw a luminous sphere suspended off the ground little way in from the shore. The semi-civilized Indians with him fled in terror but he approached, tied up the launch and hid behind bushes and rocks to watch. He saw three or four creatures of dwarfish size making repeated trips to the

sphere with dirt in their hands.

That is the story, APRO members—
we got a short report and held up this issue hoping for more informa-Because of the details, the apparently serious attitude of police and the citizens of Caracas, plus the physical cvidence left behind most spectacular report we have ever received to date. We also believe received to date. We also believe we should mention the conscientious work of members Horatio Gonzales (no relation to Gustavo, the principle in the case) and Joe Rolas. These he saw that with one push of his arm he threw Gustavo such a distance he took off for the Traffic Inspector's office which happened to be just around the corner. Pence of the papers and has etimed. comment and thought. Here-we have a case of non-human saucer pilots landing in the midst of civilization. Panic? No---only conjecture and a bit of scrious thought.

FLORENCE, IT.LY, Nov. 28. Lt.
Fulvius Donnini states that he saw
two UFO which, during one hour and
forty minutes chased a train in
which he was traveling from Florence to Rome. They looked as if made of aluminum, left orange-tinged trail and traveled at same speed as train. They speed at 1,800 to 5,400 ft. altitude, seemed to stop and change directions of times. directions at times.
