Subject: Release-Authorised:20090304-UFO Report Section 40 -U

Dear Section 40

I am writing with reference to your e-mailed report of an 'unidentified flying object', seen on 01 March 2009 over Farleigh/Warlingham, Surrey. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Farleigh/Warlingham for 1 March 2009.

I am sorry I could not be more helpful.

From: Section 40
Sent: 02 March 2009 20:18
To: Air CmdSecCS-UFO Desk
Subject: Report - Strange Lights in the Sky

I suspect they were meteors (do not believe in ET!), however, my Husband, two young children and I all clearly witnessed some very strange lights in the sky over Farleigh/Warlingham, Surrey last night, (Sunday 1st March) at approximately 7pm.

We were driving home from Selston, Surrey, and heading up Farleigh Road towards Warlingham when we spotted three very bright orange lights in the sky.

They appeared circular, with no tail that was visible, and were travelling at speed towards the East (approx). They were visible for a good 4-5 minutes very brightly, at which pointed they slowly faded and disappeared one by one.

I saw one on it's own first off, which appeared to be just above the tree line ahead, and thought it looked like an orange street lamp, but realised that as we rounded the corner there were two others - they were all high in the sky and together they appeared to be in a triangular formation to start.

We pulled over in the entrance to Farleigh Golf Club and watched as they flew over our head before disappearing. They made no noise, and we could not tell how high they were. Someone pulled over behind us, presumably to watch too, however, we did not speak to them.

Would love to know if these lights have been reported by anyone else and if anyone would know what it was we saw.

Why do we never have a camera when we really need one!

A response would be much appreciated. Many thanks

Subject: UFO sighting, West Sussex

Dear Sir

Last Saturday night (21 February 2009) my wife and I were driving west along the A27 in West Sussex at about 10.45 pm, between the B2225 turn and Poling Corner, when we saw five bright orange lights in the sky, roughly north-west of where we were. The lights were heading south, and appeared to be over the valley of the River Arun, perhaps somewhat north of Arundel. I could only get a brief glimpse at first, as I was driving, but they appeared to be in some kind of formation, with one in the lead (off-centre) and the other four behind in a loosely rectangular box configuration. It was impossible to judge their height.

About a minute or so later, I pulled over at Poling Corner, on the left-hand side of the road, to get out of the car and watch further (my wife stayed in the car). By that stage, the majority of the lights had disappeared behind the treeline, but then reappeared one after the other, having re-formed themselves into a line, with wide gaps in between. They were still heading south, but were gaining height, with each light dimming before it finally vanished. Each of them moved slowly, taking close to a minute to cover a distance of maybe one to two miles. It took about five minutes for all of them to disappear.

Although occasional traffic on the A27 would have masked sound, I listened hard in the quiet intervals between passing cars, and could not detect any engine noise coming from the lights (there was little wind that evening).

The most likely explanation, I suppose, is that these were military helicopters on a night exercise, but I have had a lifelong interest in aviation, and cannot recall seeing orange navigation lights of this kind.

I would be interested to hear any explanations that you might be able to give!

Yours sincerely

Section 40

Our Ref:
UFO Sighting Report

02 March 2009

Dear Section 40

I am writing with reference to your e-mailed report of an 'unidentified flying object', seen on 25 February 2009 over Oldham, Manchester. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

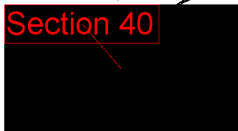

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Oldham, Manchester for 25 February 2009.

I am sorry I could not be more helpful.

Subject: Sighting over Winwick

MOD

During the early hours of 15 February 2009 at around 00:15hrs i was with my wife and two friends driving through Winwick Warrington. I was driving and sighted two orange lights in the sky which was hovering over the old hospital site that is now a housing development. The lights were not together but were stationary. We stopped the car and got out to have a look. As we did we saw other people in nearby houses also stood looking at them. There was no noise from them at all. One then began moving and moved away out of sight in a southern direction. The second light stayed in place and then after around 30 seconds also moved away in the same direction. Again there was no noise. It was out of sight within around 15 seconds. There was definitely something strange about it. I am not a real believer in ufos but there is no other explanation. I am a serving detective constable.

Dear Section 40

As the individual in the MoD responsible for UFOs, I am trying to investigate a sighting I received from a police officer.

The sighting was of two orange lights in the sky above Warrington at 00:15 on 15 February 2009.

Would CAA or indeed Manchester airport be able to identify these lights? Tracking it down through military sources would be a disproportionate cost as we don't hold central records of military flights.

The sighting amounts to no more than a description of two bright lights that moved away in a southerly direction. Whilst it would be nice to identify them, I do not wish to spend too much public money on such minimal evidence. Would you be able to tell me if ATC noted anything unusual?

Could we discuss this? My phone number is below.

Dear Section 40

I am writing with reference to your e-mailed reports of 'unidentified flying objects', seen on 22 and 23 February 2009 over south east London. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observations, I can confirm that we have received no other reports of UFO sightings so far from south east London for either night.

I am sorry I could not be more helpful.

txtincident: 22:52 23 February 2009
txtrequest: Dear Sir/Madam,

I live by Waterloo, London, on a 10th floor flat overlooking a substantial part of the southern part of the city. I have become quite perturbed over the past couple of nights by UFO's, of which I believe that I have seen 3 of varying sizes.

My profession is that of a CEO of two companies listed on the stockmarket, and so I like to think of myself as a sensible and sane individual.

The sightings involve one object with a white light and alternating red lights at an angle. The object came from south-east London, headed toward Canary Wharf, stopped in mid air, at which point an alternating sequence of red lights flashed at a 180 degree angle with the top light being on the left hand side of the object with the lights moving down toward the bottom right of the angle, before the lights switched side instantaneously and the object went back toward south-east London. Roughly one minute later the object returned in my direction, the red lights continuing to flash alongside it, before it headed north over my apartment and out of sight.

My most recent sighting took place at 22:52 tonight, 23 February 2009. This sighting occurred for four seconds, and was the flashing of a huge object taking up a portion of the sky the size of which I have never seen before. It appeared to be flying low, and had, as I recall, three lights, of which one I believe was a normal white light, and the other two were green lights. It vanished out of my sight almost immediately, and I was unable to track the lights.

If you are able to shed light on either of these two incidents I would be most grateful. I do not proclaim to be an expert in helicopters, but am able to spot one from my window with ease normally.

Many thanks.

Yours Faithfully,

UFO Sighting Report

24 February 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 19 February 2009 over Gravesend, details of which were passed to us by Kent Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Gravesend for 19 February 2009.

I am sorry I could not be more helpful.

Yours sincerely

I don't believe in little green men, but:

At just after 19.30, on the North side of Bedford, I saw a sizeable, silent, flickering orange light pass over from NW to SE. I couldn't judge it's height, but it was travelling much faster than the prevailing wind, which is negligible. It looked not unlike I'd imagine a chinese lantern to be apart from the speed of travel. It was much slower than any meteorite I've seen. My wife also witnessed it.

Subject: UFO siting - 14th February 2009 Essex

Dear Sir/Madam,

I would like to report a UFO siting on Saturday 14th February 2009 at approx 20.10.

My partner and I were travelling on the B184 from Chelmsford to The Rodings, in Essex, when we saw a bright orange object in the sky, shortly after we had passed through a village called Roxwell.

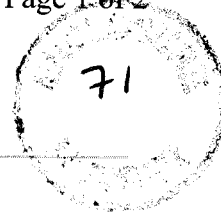

The object was high in the sky - the top was rounded, e.g. like the top of a balloon, and it was brighter orange towards the bottom. It appeared to be stationary - unfortunately, we didn't stop to watch the object further. We have never seen anything like it before and cannot think of a logical explanation as to what it could be.

Kind regards

From: Section 40
Sent: 18 February 2009 08:02
To: Section 40
Subject: Release-Authorised:20090218-UFO Report Section 40

Dear Section 40

Thank you for your e-mail of 16 February 2009 asking what the floating red lights you saw might have been.

You may be interested to know that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

You may also be interested to know that details of UFO sightings received by the MoD for the period 1997-2008 can be found on our website www.mod.uk by searching under "UFO Reports".

The MOD has already released a great deal of information about UFOs which is available for public viewing. MOD files were routinely destroyed after five years until 1967 when they were generally preserved for The National Archives. A few have survived before 1967 and these together with records up to 1992 are now available for public viewing. The National Archives can be contacted at Ruskin Avenue, Richmond, Kew, Surrey TW9 4DU or telephone, 020 8876 3444. The National Archives also have a website giving information about the records they hold and how to access them. This can be found on the internet at: <http://www.nationalarchives.gov.uk>.

I hope this is helpful.

Our Ref:
UFO Sighting Report

12 February 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 10 February 2009 over Western-super-Mare, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

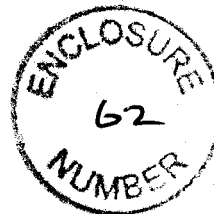

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Western-super-Mare for 10 February 2009.

I am sorry I could not be more helpful.

Section 40 [REDACTED]

5th January 2008 between 7pm and 8.30pm sited from outside QinetiQ (near Geraldine Road, Malvern, Worcs), a v-shaped formation (similar to how birds fly) of 7 lights appeared in the sky. It moved very rapidly across the sky, then appeared to rotate slightly and then the lights split up and vanished. This took approx 15 seconds. There was no noise, no visible trails left in the sky and it was a clear night. 2 people with me also saw this. The lights were about the size and brightness of stars.

Do you have any explanation for what it may have been?

Kind Regards,

Our Ref:
UFO Sighting Report

10 February 2009

Dear Section 40

I am writing with reference to your report of fireballs in the sky, seen earlier this month over Swadlincote, details of which have been passed to us by Derbyshire Police. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

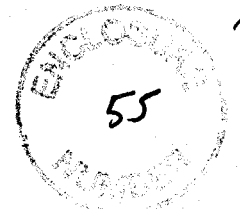

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Swadlincote for February 2009.

I am sorry I could not be more helpful.

Subject: Release-Authorised: 20090209-UFO Report Section 40 Old Colwyn-U

Dear Section 40

Thank you for your two e-mails of 17 January 2009 reporting an unusual object in the sky over Old Colwyn on 26 December 2008. Please take this as a response to both your enquiries.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Old Colwyn and are unable to offer an explanation of what you saw.

I am sorry I could not be more helpful.

Subject: New Years eve 2007

Was never sure who would be interested, but in case someone wants to know;
or if it could be cross referenced to anything;
(and I would like to know if it could be explained)

We were driving 31/12/07 on the m26 southbound.
A square of 4 white lights travelled with us for at least 10 minutes.
rotating one way then the other;
simultaneously changing in size;
like a circle within a circle.

I texted the 'Textperts' at the time to ask if there were any light shows
going on for the New Year celebrations. Although as lazer shows go, it
would have been a pretty poor display, and I don't see how it could have
followed us for so long. There were no beams originating from anywhere;
just lights in the clouds.

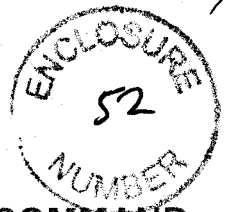

My mind ran to lights from emergency vehicles for helicopter surveillance
or vice-verce although I have no knowledge of these.
I don't have any particular belief in UFO's but couldn't come up with a
better explanation.
I always meant to follow it up, but life overtakes you, and then I came
across your name.

Please feel free to forward this information, if you feel it is worthy,
thanking you for your time,

Section 40

I had a phone call from the Department for Transport Duty Officer at 2230 on Friday, to report a possible UFO sighting. The sighting was reported by a Section 40 Rossendale, Lancashire, Section 40 to the Lancashire Police (contact Section 40), who in turn reported it to the DfT. The incident number is 1722 of 06Feb09. Section 40 stated that he saw blue and purple flashing lights over the moors, for a period of approximately 30 minutes. No action requested on this, just for info...

I particularly enjoyed your piece on the defence intranet this morning – the diagrams were really special!

Kind regards

Did anyone else notice a bright orange light travel across the sky (Exmouth) tonight?
27 December 2008 at approx 8.22pm?

We both saw this light very clearly. There was no sound. It moved across the sky
erratically, and it cant be explained by an airplane or helicopter.

Do you know of an explanation?

We have captured some of this on a mobile phone, is it possible to use this footage,
and to examine this sighting in more detail?

Please respond, thank you

Sir, My partner and I saw this object travelling from the direction of Undy, Near Newport towards the Severn Bridge at 20:58 hrs on the 23rd of January 2009.

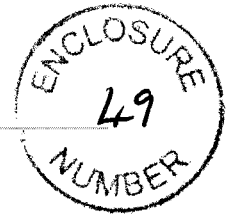

We watched the object approach us at a height of approx 200 to 500 metres. It had a large light on the front. As it came nearer we could see two other small lights one red and one green on either side as if on the ends of wings. However as it passed overhead I could see that the base was a perfect square and appeared to be black in colour. There was a quiet humming sound. After it had passed over head my partner took the attached photograph on her mobile phone. Could you please advise me as to what this object may have been.

Subject: Release-Authorised: 20090209-UFO Report Section 40 Chesterton-U

Dear Section 40

I am writing with reference to your e-mailed report and photographs of an 'unidentified flying object', seen on 4 February 2009 near Chesterton. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings from the Chesterton area for 4 February 2009.

I am sorry I could not be more helpful.

05/02/2009

Dear Sir / Madam,
Whilst driving along Wolstanton Road, Chesterton, Newcastle Under Lyme at 18:32 on 04/02/2009 I noticed an orange light fairly low in the sky.
At first I thought it was a street light but then realised that it was too high in the sky. It was a dullish orange colour and what made me think it strange was that it was approximately 15-20 times larger than a normal star but at the same time not as bright. I also knew it was not Venus as that is visible in another part of the sky. The object was circular in shape but did not have a defined edge and its surface appeared to have movement or texture much like a small section of the sun's surface but infinitely dimmer.
I pulled over in my car and pointed the object out to my two children Section 40 and Section 40. Section 40 asked me what it was to which I could only tell her that it might be a fireball as I had heard of these in the press and Section 40 asked 'what's the orange round thing in the sky'.
I grabbed my mobile phone and tried to take a photo of the object but it did not appear on the photo. I then switched my phone to video camera mode and filmed the object for approx forty seconds. As I was filming, the object looked as though it was beginning to back away from us whilst getting slightly higher in the sky and at this same time it was also reducing in size.
When the object reached about half the size it was when we originally spotted it an aircraft appeared from my right hand side and appeared to be heading in the direction of the object whilst giving it a wide berth. A few seconds later the object reduced to a pin point of light and then completely disappeared from view.
On arrival back home I took out my mobile phone and the film I had taken of the object was gone but the photo I had taken remained intact.
On viewing the photo the ball of light can be clearly seen.
There are a number of stars in the photo so establishing whether this object should have been there or not should be easily calculable as there are several points of reference within the photo and the exact time and date is known.
Unfortunately I am having problems attaching the photo to this mail at this time.
Many thanks

Subject: Sighting

Hi, I'm not sure that these were UFOs, but last night on 7 February 2009 I saw 2 strange lights in the sky over Basingstoke in Hampshire.

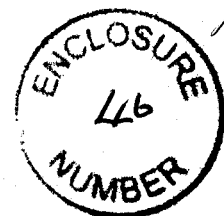

At 11.10pm my partner and I noticed a very bright orange light travelling very fast from North to South East. It was too large and bright to be a plane, it was in view for approx 1 minute then disappeared behind a cloud. We could notice no noise or tail.

At 12.10am on 8 February I noticed what appeared to be an extremely bright, white star, where the orange light had originated. The star seemed to fall out of the sky, towards the ground very quickly. It disappeared within seconds.

If you happen to know what these lights were and could let me know, I would appreciate it.

Kind regards

Hello

I have just left an answerphone message with you but im a bit shook up so dont know how clear I was.

My name is Section 40, i live at Section 40 West Row, Section 40 telephone number Section 40

At approx 10.10pm this evening I was driving back frommildenhall and was coming up Pott Hall Road when i noticed a fairly bright clear light shooting across the sky from mildenhall, at first glance i thought it was a shooting star but then noticed it was going for quite a while. When it got to just above the road in front of me, (it would have been approx a couple of 100 feet in the air, at a guess, but seemed to be a good 250-300 metres in front of me), i noticed that there were blue lights almost in line with the clear light going across it, they were evenly spaced out and were spinning round, not really fast as I could make them out. It didnt quite hover but slowed down a lot, after a few seconds it disappeared off at approx a 100 degree angle in the other direction. I didnt get a picture as was driving (and nearly crashed watching that).

Has there been any sightings like this around here?

If you wish to speak to me anymore please do not hesitate to contact me. If at work I do not always have my mobile in front of me so leave a message and i wil get back to you.

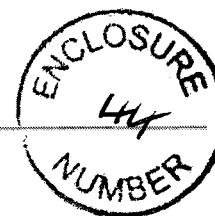

Thank you

txtrequest: Hi,

Don't know if this is a low flying complaint!? What it is, I do not know. I was leaving the gym after training on Sunday night. I stopped in the car park to speak to a friend. While we were chatting, in the sky above us, there was an extremely bright blue circular light. I could tell it was way high up and not low. The light came flying down at about a 45 degree angle, (like it was something falling?, it stopped dead, went shooting upwards again, stopped, then back down at a steep angle again towards the ground. All of a sudden, it vanished. Like I say, it's not a low flying complaint, only the people I mentioned it to said it was probably a shooting star. It wouldn't have moved how it did though surely? Anyway, sorry if I have wasted your time there. I'm not some nut job, I'm quite sane and graduated twice. I can only tell you what I seen. Hope that helps,

Kind Regards,

Sirs.

As part of research I am performing, I am contacting yourselves to acquire additional information.

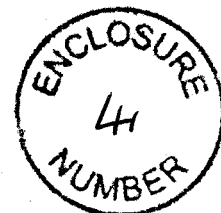

On Thursday 22nd January 2009 at 2230hrs, a report of lights in the sky above Nether Poppleton near York in Yorkshire has been recieved.
The lights were seen coming from an South Easterly direction to above the village and carrying on Northerly.

I believe we have a explanation for the event, but as part of the process of elimination and fact finding, I ask yourselves if you can offer any information to me regarding objects in the area on that date.

Kindest regards

MIS-FILED!

Dear Section 40

Many thanks for responding to my enquiry.

Numerous people have reported seeing these lights locally via the local press. It appears that these were Chinese lanterns which were on sale locally and released by members of the public at various times over the Festive season.

My apologies for wasting your time.

Yours sincerely

 Subject: 20090128-FOI Request Section 45 O Carlisle 29-12-2008-133956-021

Dear Section 40

Thank you for your Freedom of Information request of 28 December 2008, which reported orange lights over Carlisle on Christmas Day and asked whether they could have been caused by Meteorological Office equipment.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

I can confirm that we have received no other reports of UFO sightings so far from the Carlisle area for Christmas Day. As regards your question as to whether the lights could have been Meteorological Office equipment, I am afraid I do not hold such information. If you would like to contact them directly, their website address is www.metoffice.co.uk.

I am sorry I cannot be more helpful.

If you are unhappy with this response or you wish to complain about any aspect of the handling of this request, then you should contact me in the first instance. If informal resolution is not possible and you are still dissatisfied then you may apply for an independent internal review by contacting the Director of Information Exploitation, 6th Floor, MOD Main Building, Whitehall, SW1A 2HB

28/01/2009

-mail InfoXD@mod.uk). Please note that any request for an internal review must be made within 40 days of the date on which the attempt to reach informal resolution has come to an end.

If you remain unhappy following an internal review, you may wish to take your complaint to the Information Commissioner under the provisions of Section 50 of the Freedom of Information Act. Please note that the Information Commissioner will not investigate your case until the internal review process has been completed. Further details of the role and powers of the Information Commissioner can be found on the Commissioner's website, <http://www.informationcommissioner.gov.uk>.

Yours sincerely,

The Constitution Unit, a research body at University College London, is carrying out an independent evaluative study of the Freedom of Information Act 2000 in co-operation with a number of public authorities, including the Ministry of Defence. An important part of the evaluation process is gathering the experiences and opinions of FOI requesters like you. Any information you provide will only be seen by the Constitution Unit and will be handled in accordance with its privacy policy explained in the survey. The Ministry of Defence will only see the published results: no individual responses will be visible to us and your participation will have no effect on your future dealings with the Ministry.

*If you would like to take part in this study, please visit the following link to be taken directly to the survey: <http://tinyurl.com/6prff8>. Or, if you prefer, contact Ben Worthy at b.worthy@ucl.ac.uk or on **Section 40** to ask more about the study.*

If you have filled this survey out before, we invite you to fill it out again in light of the recent response to your request.

Classification: NOT PROTECTIVELY MARKED

Hi Section 40

Thanks for the email, I didn't really know what to do with it to be honest and only let you know in case it helped in any way, I am not usually a believer in such things but this was strange. I didn't want anyone to think I had "lost the plot".

You were the only people that I could find to tell according to our force policy (mind you I have not made my sighting common knowledge).

Thanks very much for your time,
 Wendy

 Subject: 20090128-UFO Report Section 40 Brightlingsea-U

Dear Section 40

I am writing with reference to your e-mail of 13 January 2009 reporting an 'unidentified flying object', seen over Brightlingsea in Essex. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the

precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Brightlingsea k this year. However, I will check whether military air defence staff are aware of any relevant unusual occurrence and will let you know accordingly.

Subject: Unusual sighting

Good evening,

I am writing to report an unusual sighting. At approximately 18:15 this evening (26/01/09) I was driving down New Street Hill to Oaktree Gardens in Bromley, Kent. In the sky I saw three orange lights in a horizontal line above the opposite side of the hill – almost as if a pylon had been erected. I turned into Oaktree Gardens and stopped to look between the houses at where I had seen the lights – they were no longer there.

I knocked at my Parents house and noticed the lights again in the sky but now much further towards the Leamington Avenue side of the hill. There were now four lights – two separate at the top of the line and two close together at the bottom. The two at the top maintained their distance but travelled higher into the sky then disappeared. At this point the two at the bottom separated into a horizontal formation, moved higher and then vanished as well.

They moved rather slowly and there were passing planes which must have seen this happening.

I am keen to know if anyone else has reported this, or if there is a confirmed simple explanation. My father witnessed everything following the point at which I knocked. We are both of the impression that this was not aeroplanes.

Regards

Subject: Sat Jan 24

Dear Sir/Madam,

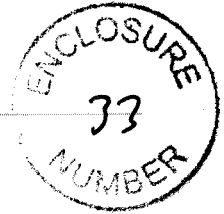

I would be interested to know if any unusual phenomena have been reported in the sky over Bristol on the night of Saturday, January 24, at about 11.05pm. My friend and I were walking home from a dinner party in Henleaze tonight and saw a large object travelling at high speed directly above us. It seemed to be spherical in shape and bright orange in colour. It appeared to be moving at a fairly low altitude, as it was much bigger than any planes or helicopters I have ever seen. It had no flashing lights of the sort used by standard aircraft but instead glowed brightly all over, resembling a large firefly or, my friend suggested, a flying street lamp. It moved completely soundlessly, we listened for engines (as there was no traffic around on the roads we would certainly have heard any helicopter or plane engine) but heard nothing. It seemed to fly in a different way to any plane or helicopter - its movement was smooth and very swift, almost like a distress flare when it arcs across the sky, except it kept a level trajectory the entire way. We watched it until it was out of sight and it did not once lose either its height or its glow. For these reasons I am pretty certain it could not have been a balloon, a plane, a helicopter or a glider. The all-over bright orange glow, the shape, speed and style of movement were of a type I have never seen before. It was moving too slowly to be a shooting star and was far too big.

I'm happy to accept there may be a completely normal explanation for it, but would be curious to know either if there were other sightings tonight or if any natural or man-made phenomenon would provide a logical explanation

Yours Sincerely,

Subject: Weird sighting by RAF Northolt

Dear Sirs,

I know I may seem like a lunatic but I was walking home from work with a colleague last night at approx 5.15pm when in the sky we saw what can only be described as a bright orange oval in the sky. At first we thought a plane from Heathrow or a helicopter from RAF Northolt was on fire but as it kept moving it became apparant this was not the case after watching it for 5 minutes. It was travelling in the direction from RAF Northolt towards Heathrow Airport. After about 5 minutes the bright orange glow petered out and continued but now was totally black.

I've lived in this area all my life and have never seen anything like this before.

Sorry to trouble you with this but due to it's location and the security level at the moment I thought I should mention it.

Many thanks

Our Ref:
UFO Sighting Report

27 January 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen over Oxford this month, details of which were passed to me by Air Traffic Control in Birmingham. This office is the focal point within the Ministry of Defence for correspondence relating to UFOs.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena.

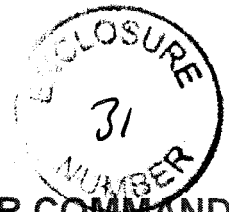

With regard to your particular observation, I can confirm that we have received no other reports of UFO sightings so far from Oxfordshire this year. However, I will check whether military air defence staff were aware of any relevant unusual occurrence and will let you know accordingly.

Tom Pearce

To whom it may concern.

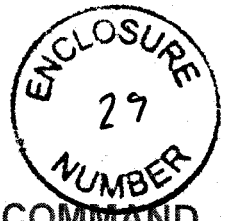

Tonight at 8:40 pm myself and my partner looked out of our kitchen window to find a very unusual object. The object was a very large ball (looked like a fireball) it looked liked it was coming towards us but looked very close down to us. My partner got my digi cam and we ran outside to see it again. I took a picture of this object. It was moving rather quickley so i could not get it close up. By the time we got out side the object was rather small but not far away. No noise came from this object and i did infact get a small videoclip of it moving. Me and my partner saw the object in Anlaby at the Haltemprice leisure center then it moved towards Morrisons supermarket.

I contacted humberside police (ref number 606 23rd jan 09) and they asked me to contact you. i have infact been trying to call you and i used all the credit on my mobile phone to do this. I asked an employee of the MOD to call me back as my credit was running out but he refused. I tried to reverse call to the MOD but again the mod wouldn't accept the calls. I would be grateful if you could please contact me for further details on Section 40. I have already put a ticket out on your website then i found this address so i thought i would give this address ago.

Your sincerley

txtrequest: Enquiry: I hope that you can help as this isn't a complaint. Like many others my husband and I saw strange objects flying in the south side of Glasgow. We were driving on Cathcart Road in Glasgow (think G44 postcode) heading towards the city centre. To our left were what we counted as 6 objects, in what to the eye was a static formation. Two lines of 3 sitting side by side, one line a little higher than the other. One object above the other. We turned off the main road to park the car and take photographs. They were now in front of us and we were facing west. We have never in our lives seen objects in the sky like this. Luckily we pulled over where other members of the public had pulled over, along with dog walkers who had congregated in amazement. Without managing to take a photo the objects seemed to start moving further away, drawing themselves together to make themselves look like one object and it/they it disappeared into the distance heading towards the west. At first quick glance they looked like they could have been helicopters but they definitely weren't. The light that they emitted was very strong and surrounded each object in full. It was a yellow/orange. The whole sight was so extraordinary that after talking about it for hours we began to doubt ourselves. This is why we're so very glad to have met with other members of the public so that our doubts couldn't be verified. We began to reason that the event would be in the local news as some sort of Christmas hoax but unfortunately we've not heard of anything apart from sightings on the 30th December about 20 minutes away by car! We would be most very thankful if you could inform us as to what these could have been. Many thanks and kind regards, Section 40

21 January 2009

Dear Section 40

Thank you for your Freedom of Information request of 10 January 2009 asking any and all files regarding an alleged UFO incident over Cologne in 1988/89.

I have established that the information you requested is not held by the Ministry of Defence (MoD). The MoD UFO files for 1967 to 1992, which would cover the incident you are interested in, and any files prior to 1967 which have survived, have been passed to The National Archives at Ruskin Avenue, Kew, Richmond, Surrey, TW9 4DU, Telephone: 0208 876 3444. Details of how to access these records and The National Archives on line catalogue can be found on their website at www.nationalarchives.gov.uk.

You may also be interested to know that the MoD has a programme to transfer a further 150 files covering the period up to 2007 to The National Archives by the end of 2010. The MoD has also released details of UFO sightings for the period 1997-07 on its website www.mod.uk, which can be found by searching under "UFO Reports". Details for 2008 will be added shortly.

I hope this is helpful.

If you are unhappy with this response or you wish to complain about any aspect of the handling of this request, then you should contact me in the first instance. If informal resolution is not possible and you are still dissatisfied then you may apply for an independent internal review by contacting the Director of Information Exploitation, 6th Floor, MOD Main Building, Whitehall SW1A 2HB (e-mail InfoXD@mod.uk). Please note that any request for an internal review must be made within 40 working days of the date on which the attempt to reach informal resolution has come to an end.

If you remain unhappy following an internal review, you may wish to take your complaint to the Information Commissioner under the provisions 50 of the Freedom of Information Act. Please note that the Information Commissioner will not investigate the case until the

internal review process has been completed. Further details of the role and powers of the Information Commissioner can be found on the Commissioner's website, <http://www.informationcommissioner.gov.uk>.

Yours sincerely

Section 40

The Constitution Unit, a research body at University College London, is carrying out an independent evaluative study of the Freedom of Information Act 2000 in co-operation with a number of public authorities, including the Ministry of Defence. An important part of the evaluation process is gathering the experiences and opinions of FOI requesters like you. Any information you provide will only be seen by the Constitution Unit and will be handled in accordance with its privacy policy explained in the survey. The Ministry of Defence will only see the published results: no individual responses will be visible to us and your participation will have no effect on your future dealings with the Ministry.

If you would like to take part in this study, please visit the following link to be taken directly to the survey: <http://tinyurl.com/6prff8>. Or, if you prefer, contact Ben Worthy at b.worthy@ucl.ac.uk or on Section 40 to ask more about the study.

If you have filled this survey out before, we invite you to fill it out again in light of the recent response to your request.

Subject: FOI Request Re. RAF Wildenrath

Dear sir/Madam

I would like to request a copy under the freedom of information act 2000 of any and all files relating to an event involving an alleged UFO sighted shadowing an airliner over Cologne in 1988/1989 I'm not sure of the exact date, i also understand that 2 Phantom jets were scrambles to either intercept or observe this object and on of the jets went supersonic, the resulting sonic boom was first thought to be an IRA bomb attack but later rejected as the cause, i also understand there was involvement by military personnel from RAF Wildenrath and the whole case was reported in the press following the sighting.

If this request has landed on the incorrect desk i would be very grateful if you could pass my request onto the relevant dept.

I also submit my full postal address for any files you can forward to me.

Subject: Release-Authorised: 20090121-UFO REPORT OLD COULSDON Section 40

Dear Section 40

Thank you for your e-mail regarding an object you saw over your house in Old Coulsdon in Surrey, around midnight on 12 January 2009.

Firstly, it may be helpful if I explain that the Ministry of Defence (MoD) examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no UFO report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MoD knows of no evidence which substantiates the existence of these alleged phenomena

I have checked and can confirm that there were no military aircraft booked into the low flying system at this time. However, you might like to consider contacting your local police force to see if any police helicopters were operating in the area at the time.

Yours sincerely,

I would like to report an incident which occurred in the early hours of this morning

It was midnight and I heard what I thought was a helicopter outside my house which is on the Old Coulsdon in Surrey

I looked out of the window and could make out a shape in the sky which didn't look like a helicopter but sounded like one but was very very loud

It hovered in the same place for an hour after which it moved sideways heading towards Caterham in Surrey where it was spotted by a friend of mine who thought it was going to Crash into the houses the noise was so bad.

Please could this be looked into ?

Regards

Our Ref:
 UFO Sighting Report

12 January 2009

Dear Sir,

I am writing with reference to your report of an 'unidentified flying object', seen in January 2009 over Halifax. It has been passed to this office as we are the focal point within the Ministry of Defence (MoD) for correspondence relating to 'UFO's. We do not have your name and were therefore unable to address this letter to you as an individual, for which I apologise.

Firstly, it may be helpful if I explain that the Ministry of Defence examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MOD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of 'UFO' sightings so far from Halifax for January 2009.

I am sorry I could not be more helpful.

Yours sincerely

Section 40

Our Ref:
UFO Sighting Report

12 January 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen over the weekend of 3-4 January 2009 near Sandbach, the details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's.

Firstly, it may be helpful if I explain that the Ministry of Defence examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MOD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we received no other reports of 'UFO' sightings so far from Sandbach for January 2009. We are satisfied that there is no corroborating evidence to suggest that the United Kingdom's airspace was breached by unauthorised aircraft.

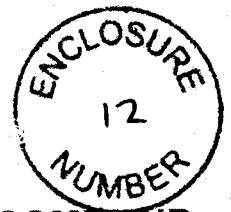

I am sorry I could not be more helpful.

 To: Air CmdSecCS-UFO Desk
 Subject: 9 x UFOs 04/01/09 - Rossendale, Lancashire

Sirs

In fear of being labelled 'crazy', I wish to report the following inexplicable occurrence that I witnessed recently whilst walking my dog just after midnight, Sunday 4th January 2009!

Date: 04/01/09

Time: 00:25 to 00:30

Weather: Freezing cold, clear sky, some slight cloud

Place: Section 40 Haslingden, Lancashire Section 40

- I set off from my home and turned left at the end of Section 40 on to Section 40
- Just before the telephone pole at the 90 degree left turn on Section 40 I noticed directly in front of me, at some distance and through some trees, a moving, bright, solid-orange light.
- My first thought was as to how ridiculously low that aircraft was flying (I guess from the south-east/Manchester direction), but dismissed that thought when the light approached the Ramsbottom-ish area and was followed by 2, 3, 4 & more identical objects!
- I then thought they might be military helicopters, due to the follow-the-leader formation but could see **no** flashing lights or red/green lights of fixed-wing aircraft. Also, in the quietness of that time of night, apart from the odd distant car - **there was NO noise from these objects whatsoever!**
- As the first light - which seemed to follow the Rossendale Valley/M66 - came closer (at what seemed a considerable speed), it rose almost vertically over the other side of the valley (above Scoutmoor Windfarm/maybe towards Rooley Moor, Rochdale), followed at regular 2 to 3 second intervals **by a further EIGHT identical objects.**
- At this point, I was stood with the dog, motionless in front of the house on this 90 degree corner wondering what the hell I was looking at.
- Behind me there was a couple in the house watching TV and I beckoned them to the window to watch/witness what I was seeing. Although I didn't speak to them ("*who is this madman waving outside our house*"), they did come to the window when I pointed skyward and they certainly saw these objects.
- Once all **NINE** lights had risen to a height when their brightness was faded, they gathered, I kid you not, in a 'diamond nine' formation, then one by one - in the order that they had passed me and risen - they faded and disappeared, or simply gained further height and went out of sight.
- **DID ANYONE ELSE SEE THIS, OR AM I GOING CRAZY?**
- Please contact me if you would like to ask any questions. I need to find a logical explanation for this event, as I can't offer any suggestion(s) of my own.

I am unable to give distances and speed of these things, having no sort of reference to their size - but they were quick!

Yours faithfully

Subject: Release-authorized: 20090109-Response to Section 40 Ashford UFO Sighting-U

Dear Section 40

Thank you for your enquiry of 30 December 2008 detailing an unusual sighting you made in the sky over Kennington, Ashford in Kent on Boxing Day and asking if the Ministry of Defence (MoD) had any record of any similar sightings. It has been passed to this office to deal with as we have responsibility for answering questions relating to "UFO"s.

Firstly, I think it would be helpful if I gave you some background about the MoD role in UFO matters. Despite what many people think, the MoD does not have any expertise or role in respect of 'UFO/flying saucer' matters or the question of the existence or otherwise of extraterrestrial lifeforms, about which it remains totally open-minded. I should add that to date the MoD knows of no evidence which substantiates the existence of these alleged phenomena. The MoD examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorized foreign military activity.

Unless there is evidence of a potential threat to the United Kingdom from an external military source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MoD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

I can however, tell you that the MoD received no other reports for Kent on 26 December 2008.

I am sorry I could not be more helpful.

Yours sincerely,

txtrequest: Dear Sirs, I have recently experienced some unexplained aerial activity and would be interested in your response. It happened on the eve of Boxing Day between 1900 & 1930hrs over Kennington, Ashford, Kent. I was driven to my home by my daughter just after 1900hrs, to collect our dog and walk her back to my daughters to continue our festive family day. Upon arriving at my address, about to unlock the door, when my daughter (& pointing) said 'look dad, what is that up there' and looking upward I observed an orange shape travelling from the NE to the SW at a fair pace, but not excessive. Height was difficult to judge, but it seemed slightly higher than normal light aircraft altitudes we have overhead. Could be 2000ft + depending on the distance it was, and of course the size? As I said, it was a bright tangerine orange object similar to an inverted light bulb in shape, configured vertically, with a distinctive orange glow around it. I fumbled for my digital camera and photographed it, by then some distance away on standard setting. My daughter then left for home and I proceeded to get the dog ready for my return on foot to my daughters house. On leaving my home I glanced back to check the gate was closed and to my astonishment another of these objects appeared, followed by two more. I could not believe what I was seeing, and again took out my camera, set it to night mode and took several pictures - again by then travelling further away from me. The direction and altitude were pretty much identical to the single one some 15mins previous. There was NO sound at all, not an aircraft of any known description to me (I am an aviation enthusiast and amateur historian). If this was a prank it was well done, it looked convincing to me! I have tried to enhance the photos but it only reveals crude orange shapes, which is not surprising when holding the camera at night. Do you have any knowledge of such sightings at this time? Incidentally, totally independent of my sightings, my wife reported to me some week or so before, that she saw an orange light shoot across and upward in the sky one evening, while looking at the stars.

Sorry for the drawn out tale, but that's how it happened as I saw it.

Yours sincerely

Section 40

Our Ref:
UFO Sighting Report

9 January 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 6 January 2009 over Cardigan, details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's.

Firstly, it may be helpful if I explain that the Ministry of Defence examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MOD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters to the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we have received no other reports of 'UFO' sightings so far from Cardigan for January 2009. There were two military aircraft authorised to fly over Wales within the low flying system between 15:00 and 16:00 on the date in question.

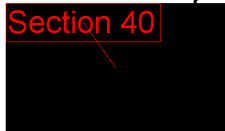

The Civil Aviation Authority who can be contacted on www.caa.co.uk may be able to tell you if any civilian aircraft were operating in the area at the time. We are, however,

satisfied that there is no corroborating evidence to suggest that the United Kingdom's airspace was breached by unauthorised aircraft.

I am sorry I could not be more helpful.

Yours sincerely

Subject: RE: UFO SIGHTING

Only aircraft booked into LFA 7 (the whole of Wales) were a Tornado from RAF Marham booked into LFA 7 between 1534 and 1549 and a Tucano from RAF Valley between 1500 and 1540.

It must've been aliens from outer space.

Did we have anything booked into the low flying system for 6 Jan 09 at "sundown" which I suggest is between 15:30 and 17:00.

5 bright orange lights over Cardigan which is on the Welsh coast (Pembrokeshire).

Our Ref:
UFO Sighting Report

9 January 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 8 January 2009 over Blackpool, the details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's.

Firstly, it may be helpful if I explain that the Ministry of Defence examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MOD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters to the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we received no other reports of 'UFO' sightings so far from Blackpool for January 2009. We are satisfied that there is no corroborating evidence to suggest that the United Kingdom's airspace was breached by unauthorised aircraft.

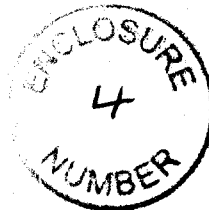

Sorry I could not be more helpful.

UFO Sighting Report

8 January 2009

Dear Section 40

Thank you for your e-mail of 1 January 2009 reporting 2 objects in the sky over Milton Mowbray in Leicestershire. This office is the focal point within the Ministry of Defence for correspondence relating to "UFO" matters.

Firstly, it may be helpful if I explain that the Ministry of Defence examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MOD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters to the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we received no other reports of 'UFO' sightings for Leicestershire over this period. We are satisfied that there is no corroborating evidence to suggest that the United Kingdom's airspace was breached by unauthorised aircraft.

I am sorry I could not be more helpful.

Yours sincerely,

txtrequest: Sorry if this is not the correct way to report this but I need to report a sighting of a UFO.
There were 2 round, bright, orange lights/objects in the sky at the above mentioned time and date over Melton Mowbray, Leicestershire. I live in South of the Borough of Melton and I saw them whilst I was facing North from the front of my house.
They hovered & glided quite slowly and at one point looked like they were going to collide then one sort of flashed and disappeared after about 1 minute and then about another minute later the other one disappeared. They did not make any noise that I could hear.
I had 5 others in the house, my husband included and we all have the same opinion that these objects were definately not helicopters, planes or fireworks. We had all consumed alcohol but were sober enough to realise this fact, otherwise I would not even think of reporting the sighting officially because I can hardly believe what I saw myself.

I would be grateful if someone could get back to me in some form or another.

Many Thanks

UFO Sighting Report

8 January 2009

Dear Section 40

I am writing with reference to your report of an 'unidentified flying object', seen on 1 January 2009, the details of which you left on our answerphone. This office is the focal point within the Ministry of Defence for correspondence relating to 'UFO's. I apologise if I have misspelt your surname, the answerphone can be hard to understand.

First, it may be helpful if I explain that the Ministry of Defence examines any reports of 'unidentified flying objects' it receives solely to establish whether what was seen might have some defence significance; namely, whether there is any evidence that the United Kingdom's airspace might have been compromised by hostile or unauthorised air activity.

Unless there is evidence of a potential threat to the United Kingdom from an external source, and to date no 'UFO' report has revealed such evidence, we do not attempt to identify the precise nature of each sighting reported to us. We believe that rational explanations, such as aircraft lights or natural phenomena, could be found for them if resources were diverted for this purpose, but it is not the function of the MOD to provide this kind of aerial identification service. It would be an inappropriate use of defence resources if we were to do so.

The MOD does not have any expertise or role in respect of 'UFO/flying saucer' matters to the question of the existence or otherwise of extraterrestrial life forms, about which it remains totally open-minded. I should add that to date, the MOD knows of no evidence which substantiates the existence of these alleged phenomena.

With regard to your particular observation, I can confirm that we received no other reports of 'UFO' sightings so far from Chippenham for 1 January 2009. We are satisfied that there is no corroborating evidence to suggest that the United Kingdom's airspace was breached by unauthorised aircraft.

Sorry I could not be any help.

Yours sincerely
