

Jean-Charles Duboc statement / press conference Barcelona, July 24, 2009

My name is Jean-Charles DUBOC, and I am a retired Air France Captain.

During Air France Flight 3532 from Nice to London, on 28 January 1994, I observed, with my crew, a UFO near Paris.

The time was 1:00 P.M, and the visibility was excellent with some altocumulus clouds.

That object had been identified initially by a steward who was in the cockpit and by the copilot.

When I saw this UFO, it was in evolution and had a bank angle of 45°.

Then it stabilized and stopped moving.

It seemed to be a huge flying DISC.

We observed it over one minute on the LEFT on our plane, surprisingly totally stationary in the sky, and it disappeared progressively.

This large object was below us at the altitude of 10 000 m (we were at the altitude of 12 000 m), and it was at a distance of about 45 km.

The colour was RED BROWN with BLURRED outlines.

The apparent diameter of this object could be compared to the diameter of the moon, or the sun.

That means that it was about 300 meters wide.

This UFO seemed to be embedded in a kind of magnetic or gravitational field, with no lights or visual metallic structure, which gave it a really FUZZY appearance.

It became transparent and disappeared in about 10 to 20 seconds.

Simultaneously, the radar of the Operational Centre of the Air Defense (the CODA), registered a one minute spot crossing the track of our plane.

We reported our sighting to Reims traffic control.

When I recorded the estimated position of the UFO on an aeronautical chart, I was surprised to realize that its position was near the base of Taverny which hosts the headquarters of the French Strategic Air Command.

[2]

This sighting has been studied by the French military COMETA group, under the direction of General Denis Letty, as well as by GEPAN under the French National Space Centre (CNES) in Toulouse.

The investigations determined that this sighting was unexplained and estimated the approximate length of the UFO to have been 250 m.

This observation made me realize the reality of the UFO phenomenon and the indisputable presence of spacecrafts of extraterrestrial origin in our atmosphere.

This Exopolitics Summit is the occasion to develop the industrial, social and political consequences of this reality, if we succeed to create the energy which propels UFOs.

Thank you.
