Dear Mr. President:

In a letter received on April 15, 1947, President Roosevelt requested my recommendations on the following points:

1. What can be done, consistent with military security, and with the prior approval of the military authorities, to make known to the public the general character of the contributions to our war effort that have been made during the war.

2. With particular reference to the war of science against foreign technology, what can be done now to organize a program for continuing in the future the work which has been done.

3. What can the Government do now and in the future to aid research activities by private organizations?

4. Can an effective program be proposed for discovering and developing scientific talent in America so that the continuing future of scientific research in this country may be assured on a scale comparable to what has been done during the war?

It is clear from President Roosevelt's letter that in speaking of science he had in mind the non-terrestrial sciences, including biology and physics; and I have so interpreted his questions. Progress in other fields, such as material fabrication, is likewise important; but the programs for non-terrestrial science in my report warrants immediate assistance.

In seeking answers to President Roosevelt's questions I have had the assistance of distinguished committees specially qualified to advise in respect to these subjects. The committees have given these matters the serious attention in light of recent developments; indeed, they
have regarded this as an opportunity to participate in shaping the policy with reference to scientific research. They have had many meetings since the events of this summer began to present more challenges and have submitted formal reports. I have been in close touch with the work of the committees and with their members throughout. I have examined all the data they assembled and the suggestions they submitted on the points in President Roosevelt’s letter.

Although the report which I submit herewith is my own, the facts, conclusions, and recommendations are based on the findings of the committees which have studied these questions. Since my report is necessarily brief, I am including as appendices the full reports of the committees.

A single mechanism for implementing the recommendations of the several committees is essential. In proposing such a mechanism I have departed somewhat from the specific recommendations of the committees, but I have since been assured that the plan I am proposing is fully acceptable to committee members.

The rewards of such explanation for the Nation and the individual are great. Scientific progress is one essential key to our security as a nation, to our better health, to more jobs, to a higher standard of living, and to our cultural progress.

Respectfully yours,

Vannevar Bush, Director

The President of the United States
The White House
Washington, D.C.

Very sincerely yours,
MAJIC EYES ONLY
Earth’s Encounters with Extraterrestrial Technology

By Ryan S. Wood
Forward by Jim Marrs

MAJIC EYES ONLY is the most authoritative and comprehensive chronicle ever published on the subject of worldwide UFO crashes and subsequent military retrievals from 1897 to the present. The author guides the reader through 74 UFO crash incidents supported by compelling evidence in the form of official documents, eyewitnesses and in some cases physical evidence.

Since 1984, multiple sources have leaked, revealed or discovered some 3,500 pages of UFO documents, hundreds classified Top Secret and linked to Majestic-12. These MJ-12 documents, coupled with the Leonard Stringfield data and strong investigations by other case experts, provides a powerful core of UFO crash incidents.

The idea that major governments have covered up the true nature of the UFO phenomenon for more than half a century through unprecedented secrecy, deception and intimidation strikes many reasonable citizens as preposterous. Yet, this book provides a wealth of evidence, including declassified and leaked government documents and credible eyewitness testimony, that supports the uncomfortable truth of this “preposterous” notion.
