Petit Marocain, 2 April 1967: Flying saucers over Kasba Tadla.

Several persons are said to have seen on 25 March around 1915 hours a round object 2.5 meters in diameter land on the roof of a house in Ancien-One, then resume its flight and disappear in the sky.

According to the information given by a witness, a former pupil in the school and now student in Marrakesh, the object was gliding in a circular movement and then stood 50 centimeters above their roof.

It looked to have a long shape with two distinct ends but it resumed its circular shape quickly by rotating on itself and transmitting a vivid red light. Neighbors, passers-by and children are said to have looked for a few seconds at this unusual sight.
